Savola Holds its Annual Management Conference To Review Year 2008 Performance and Share Key Learnings as Well as Year 2009 Outlook

For Annual Conference details … See page 7
The SAVOLA Group announced the financial results for the 4th quarter and the full year 2008. Despite the sharp decline in net income over the previous year, the Group continued to its top line growth, as reflected in the 32% increase in revenues to reach SR 13.8 Billion, confirming and further strengthening its leadership position in local and international arenas.

The sharp drop in commodity prices had an adverse impact on the Group margins. In addition, the sharp decline in the stock markets also resulted in making a provision to match its investment to market value. Accordingly, the Group made total provisions of SR 676 Million against its high cost inventories and investment portfolio.

The unprecedented collapse in raw material and commodity prices in the second half of 2008 led to the decrease in the Group’s gross profit margin in its core activities reducing these margins to 7% for the 4th quarter compared to the average ranging between 16% - 17%, contributing SR242 Million to the total provision. At the same time, the sharp decrease in the local, regional and international stock markets led to a decrease in the market value of SAVOLA’s investment portfolio, adding SR 434 Million to the above provision, thus lowering the year’s profits to SR 202 Million.

Although the group net loss for the 4th quarter amounted to 464 Million Riyals, it is noteworthy that, the decision to make these provisions, is in line with our pioneering role in promoting good corporate governance, transparency and accounting standards in our region. In order to realize benefits in the medium and long term, rather than the short term.

The year 2008 was indeed a year that witnessed several business achievements for Savola Group as well as major challenges. The Group commenced new promising businesses during the year, entrenched its leadership position in its core businesses and entered as well into new geographies. The most distinguished amongst these achievements were the commissioning of the new sugar refinery in Egypt with an annual capacity of 750,000 MT, launching of our new edible oils refineries in Algeria, embarking on the construction of a sugar beet refinery in Egypt and opening of 17 new Panda stores in Saudi Arabia. The Group also signed an MOU to acquire a majority stake in one of the major edible oil players in the promising market of Pakistan. However, the prevailing financial crisis also posed key challenges to our Group. The credit crisis impacted the Group mainly through the sharp collapse in its portfolio investment which followed the declining trend of worldwide stock markets. The other area where our Group got impacted was the steep decline in prices of food commodities during the second half of 2008. It is worthwhile to note here that the Group’s sound financial policies and investment strategy has Alhamdulillah steered it off from any drastic adverse impact resulting from the financial crisis.

The Group has made a bold decision to mark our investments and inventories to market value which is in line with the Group’s accounting standards. Accordingly, the Group made a total provision of SR 676 Million during year 2008. With this provision, the Group reported a net profit of SR 202 Million as compared to last year’s net profit of SR 1.23 Billion.

In terms of sales growth, the Group continued its robust growth drive through achieving a solid growth of 32% in Group’s sales revenues for year 2008 which reached SR 13.8 Billion. The growth in revenues was reflected across all business sectors as well as all geographies.

During the year 2009, the Group aims to further focus on its core businesses and leverage on its core competencies and strategic assets. The Group intends to explore several promising investment opportunities in its core businesses in the region, which will further strengthen its leadership position InshaAllah. The Group plans to match its investment to market value. Accordingly, the Group made total provision of SR 242 Million without taking into consideration any long term, rather than the short term.

Almarai Company (28% owned by Savola Group) has entered into a definitive agreement during December 2008 to acquire 75% of Taiba Investment for Developed Food Processing Company PSC (Taiba). The founders Khalil Family will retain the remaining shares (25%). The transaction was based on an enterprise value of JOD 89 million (SR 474 million) for “100%” of the shares and is expected to close in January 2009, following the completion of standard transaction conditions. This acquisition, the first outside the Kingdom of Saudi Arabia, provides Almarai with a platform for future growth. This is an important strategic venture for the group in a market that is showing considerable growth. Leveraging Almarai capabilities through the platform offered by Taiba should allow Almarai to become the preferred choice in Jordan in a short time frame. This transaction will better enable Almarai to maintain its impressive growth and track record in delivering value for shareholders. Taiba is one the leading diary players in the Jordanian markets. The company was established in 2005. Taiba recently commissioned a new plant and launched a new line of products.

It is worthy to mention that Almarai Company generated a net profit for the 4th quarter 2008 amounted to SR 219.2 Million, compared to the same period of last year SR 193.1 Million, which represents an increase of 13.5%. Turkuaz Edible Oil Industries (TEOI) in Kazakhstan is 90% owned by Savola Food Sector. Between 2004-2008 Savola Group invested 15 million USD in TEOI. The latest investment was 9 million dollars, which was mainly for second new refinery which increased capacity from 70 tons to 270 tons on a daily basis.

This investment has made Savola Foods Kazakhstan a major player in the Kazakhstan edible oil market and one of the major foreign investments in Kazakhstan. The business supports agriculture and farmers especially in Western Kazakhstan. In addition, edible oil became very strategic last year due to prices in the commodity market which led to an export ban on edible oil product in Kazakstan. The country’s Prime Minister’s made an official visit and attended the opening of the new refinery on December 14th, 2008.

This occasion was also attended by Akobe’s Mayor, Yelesin Sagindikov and the company’s partner Turkuaz’s president Zeki Pilge. Zeki Pilge and Cevdet Duru, General Manager for Savola Kazakhstan Co., welcomed Prime Minister and esteemed guests to the plant territory. Bakitjan Turmetov, Finance Director made the official presentation about Savola Group and Savola Foods Kazakhstan and gave explanations about the investment to the Prime Minister and guests. The Prime Minister went upstairs to the control room and pressed the start button to launch the new refinery. The guests greeted the sounds of the new refinery by their cheers! My thanks to Savola Group’s website www.savola.com for these details.

As a continuation to its ongoing success and in order to widen its reach even more, HERFY Company, which is 70% owned by Savola, has opened during the fourth quarter of 2008 additional four outlets: 1 outlet in Riyadh (Sulaimania Qrtr.), another in Qassim - Buraidah (Omar Bin Al Khattab St.), and 2 more outlets in Al Madinah (Noor Mall & Manar Mall). These four carefully-chosen outlets have increased HERFY’s restaurants chain, the largest in the Kingdom, to 139 outlets Kingdom wide.
